Note: These questions are not AA questions but are the guide used by JOHNS HOPKINS UNIVERSITY HOSPITAL in deciding whether a patient is alcoholic or not. In addition we in AA would ask even more. Here are a few:

- 36.Have you ever had a complete loss of memory (blackout) while, or after drinking?
- 37.Have you ever felt, when or after drinking, an inability to concentrate?
- 38.Have you ever felt remorse after drinking?
- 39.Has a physician ever treated you for drinking?
- 40.Have you ever been hospitalized for drinking?

ACCORDING TO THE HOPKINS STUDY if you answered YES to any

of these Questions, there is a definite warning that you may be an alcoholic. If you have answered YES to any two of these Questions, chances are, you are an alcoholic. If you have answered YES to any two of these Questions, chances are, you are an alcoholic. If you answer YES to three or more of these Questions, you are definitely an alcoholic.

No one in AA can tell you whether you are an alcoholic. This you must decide for yourself. Once you have made that decision then you are ready to take the FIRST STEP: "We admitted we were powerless over alcohol –that our lives had become unmanageable."
